

What is E-Waste?

Electronics waste (E-Waste) is discarded computers and other consumer electronics including items like laptops, personal computers, televisions, cell phones, etc.

Problems of E-Waste

♻️ E-Waste is the fastest growing portion of our solid waste stream.

♻️ Toxins inside your electronics may include lead, mercury, cadmium, nickel, zinc, etc.

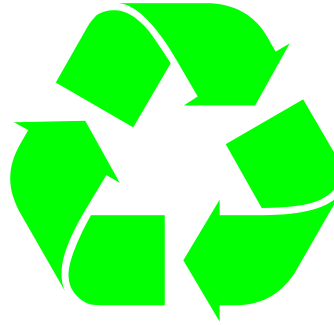

♻️ Improper handling of discarded electronics can expose the hazardous chemicals that effect human and environmental health.

♻️ Fact - A very small amount of electronics are being recycled.

♻️ THIS NEEDS TO CHANGE

“Promoting Greater Participation in Recycling”

## Green Starts Here

♻️ Our mission is to divert items from the landfill, with the long term goal of having all electronic waste (e-waste) properly recycled.

♻️ Promote awareness of the availability of electronic waste (e-waste) recycling in Allen County.

♻️ Promote proper recycling options when new electronics are purchased by Businesses, Industries, Schools, Government Offices, etc.

♻️ A cleaner and safer environment will be the end result for the residents of Allen and surrounding counties.
